

Constantina “Connie” Scoullis

Frontend and Automation Testing Software Engineer with 6+ Years of Experience

New York Metropolitan Area | constantina.info | scoullisconstantina@gmail.com | [linkedin.com/in/constantina-scoullis](https://www.linkedin.com/in/constantina-scoullis)

SKILLS

- **Technical Languages:** JavaScript (React/Redux, TypeScript), HTML, CSS (Less), Python, Java, SQL
- **Frameworks:** Node.js, Next.js, Backbone.js, jQuery, Tailwind CSS, Cypress.io, Cucumber (Gherkin), Flask, pyATS
- **Tools and Operating Systems:** macOS, Windows, Linux, Docker, Jenkins, Git, Eclipse, VisualStudio, Atom, Microsoft Office, G Suite, Atlassian (Bitbucket, JIRA, Confluence, Trello), Adobe (Photoshop, Illustrator), Postman

WORK EXPERIENCE

Software Engineer - Frontend and Quality Assurance | Effortless Presence March 2024 - August 2024

A startup consulting company that owns and operates Just A Menu, a digital signage solutions platform tailored to restaurants and food and beverage companies

- **Quality Assurance Strategy and Execution:** Developed a structured QA strategy, implementing a sanity testing plan that identified 30+ critical bugs, leading to a more stable and reliable Just A Menu platform
- **Frontend Development in React.js, Redux.js, and Tailwind CSS:** Built client-side features and enhancements for JAM Canvas, a product within the Just a Menu platform that allows users to create digital signage online, thus eliminating the need for previously used hardware components and reducing operations cost by 15%

Freelance Web Developer | Private/Self-Employed May 2023 - Present

- **Website Enhancement and Redesign for Diverse Industries:** Redesigned and optimized the online presence for 5 small businesses across fitness, healthcare, arts restoration, and alumni relations, resulting in a 20% average increase in site engagement and a 35% boost in client conversions and retention as the sole developer

Frontend Software Engineer | Cisco Systems, Inc. July 2019 - March 2023

Web application used by enterprise businesses to monitor network infrastructure health and troubleshooting assistance

- **Frontend Development in React.js, TypeScript, and Backbone.js:** Developed and launched a new dashboard leveraging machine learning insights, enabling businesses to track location-specific network performance metrics, reducing troubleshooting time by 15%
- **Web Content Accessibility Compliance:** Boosted application accessibility compliance by 30% by refactoring 30+ reusable UI components to meet WCAG accessibility standards, ensuring inclusivity for diverse user groups
- **Rapid Bug Resolution:** Resolved over 100 UI bugs, earning recognition from upper management for improving overall product quality and user satisfaction
- **Strengthened Client-Side Security:** Enhanced Assurance's client-side security by implementing a cross-site scripting sanitizer, effectively preventing the injection of malicious scripts and protecting thousands of users from potential security threats
- **UI Testing using Cypress.io, Cucumber, and Gherkin:** Led the design and development of a UI testing framework, driving the adoption of Behavior Driven Development practices and integrating visual testing into the team's workflow

Software Engineer | Cisco Systems, Inc. September 2017 - July 2019

Enterprise Networking business unit of Cisco; responsible for hardware switches

- **Functional and Automation Testing with pyATS:** Developed automation test plans for Catalyst 9K software, including the business-critical FPGA automatic upgrade, reducing manual testing hours by 25%

Engineering Intern | iCIMS June 2016 - August 2026, January 2017 - June 2017

Cloud-based talent recruiting platform with over 3 million users and is #1 in ATS market share

- **Functional and Automation Testing with Selenium WebDriver and RestAssured:** Authored 150+ test cases, covering previously undocumented bug reports, leading to a significant reduction in regression testing failures

Frontend Development Intern | Viacom Media Networks May 2015 - August 2015

Technical development for Music Television Network (MTV)'s major events that garner over 3-5 million views per event

- **User Interface and Experience Enhancements:** Transformed static microsites for major events such as the 2015 Logo Trailblazer Honors and the 2015 Video Music Awards, ensuring mobile responsiveness and improved user experience for millions of viewers

EDUCATION

Bachelors; Computer Science and Theater Arts | Rutgers, the State University of New Jersey
