

Constantina “Connie” Scoullis

Frontend and Automation Testing Software Engineer with 5+ Years of Experience

San Jose, CA | constantina.info | scoullisconstantina@gmail.com | [linkedin.com/in/constantina-scoullis](https://www.linkedin.com/in/constantina-scoullis)

SKILLS

- **Technical Languages:** HTML, CSS (Less), JavaScript (React/Redux, TypeScript), Python, Java, SQL
- **Frameworks:** Node.js, Next.js, Backbone.js, jQuery, Tailwind CSS, Cypress.io, Cucumber (Gherkin), Flask, pyATS
- **Tools and Operating Systems:** macOS, Windows, Linux, Docker, Jenkins, Git, Eclipse, VisualStudio, Atom, Microsoft Office, G Suite, Atlassian (Bitbucket, JIRA, Confluence, Trello), Adobe (Photoshop, Illustrator), Postman

WORK EXPERIENCE

Software Engineer - Frontend and Quality Assurance | Effortless Presence March 2024 - August 2024

A startup consulting company that owns and operates Just A Menu, a digital signage solutions platform tailored to restaurants and food and beverage companies

- **Quality Assurance Strategy and Execution:** Developed a sanity testing strategy for the Just a Menu platform; performed weekly testing based on test plan; reported over 30+ bugs and areas of improvement
- **Frontend Development in React.js, Redux.js, and Tailwind CSS:** worked alongside Effortless Presence software engineers to build client-side features and enhancements for JAM Canvas, a product within the Just a Menu platform that allows users to create digital signage online

Freelance Web Developer | Private/Self-Employed May 2023 - Present

- **Website Enhancement and Redesign for Diverse Industries:** Collaborated with small businesses in fitness, healthcare, and arts restoration to revamp their online presence, crafting customized website designs that align with each business's unique goals and enhance user engagement

User Interface Software Engineer | Cisco Systems, Inc. July 2019 - March 2023

Web application used by enterprise businesses to monitor network infrastructure health and troubleshooting assistance

- **Frontend Development in React.js, TypeScript, and Backbone.js:** Developed a new type of dashboard that leveraged data collected from the machine learning team to illustrate location-specific network key performance indicators, and enhanced the user interface for various networking equipment-specific pages to include additional information regarding status and performance
- **Web Content Accessibility Compliance:** Refactored over 30 reusable components so that they are WCAG-compliant
- **Rapid Bug Resolution:** Earned commendation from upper management for swiftly resolving over 100 cosmetic and functional bugs, significantly improving product quality and user experience
- **Strengthened Client-Side Security:** Enhanced Assurance's client-side security by implementing a cross-site scripting sanitizer, effectively preventing the injection of malicious scripts and safeguarding the integrity of the platform
- **UI Testing using Cypress.io, Cucumber, and Gherkin:** Led the design and development of a UI testing framework, driving the adoption of Behavior Driven Development practices and integrating visual testing into the team's workflow

Software Engineer | Cisco Systems, Inc. September 2017 - July 2019

Enterprise Networking business unit of Cisco; responsible for hardware switches

- **Functional and Automation Testing with pyATS:** Developed and maintained comprehensive test plans for key features in the Catalyst 9K software platform, including the business-critical FPGA automatic upgrade

Engineering Intern | iCIMS June 2016 - August 2016, January 2017 - June 2017

Cloud-based talent recruiting platform with over 3 million users and is #1 in ATS market share

- **Functional and Automation Testing with Selenium WebDriver and RestAssured:** Authored over 150 test cases that cover previously undocumented bug reports and projects, and participated in regular department-wide regression

Frontend Development Intern | Viacom Media Networks May 2015 - August 2015

Technical development for Music Television Network (MTV)'s major events that garner over 3-5 million views per event

- **User Interface and Experience Enhancements:** Implemented key UI changes for the 2015 Logo Trailblazer Honors and 2015 Video Music Awards, and transformed MTV's "Faking It" and Logo's "High School Trailblazers" static microsites into mobile-friendly, responsive pages that enhanced user engagement and experience.

EDUCATION

Bachelors; Computer Science and Theater Arts | Rutgers, the State University of New Jersey May 2017
